Surveys and Recordings

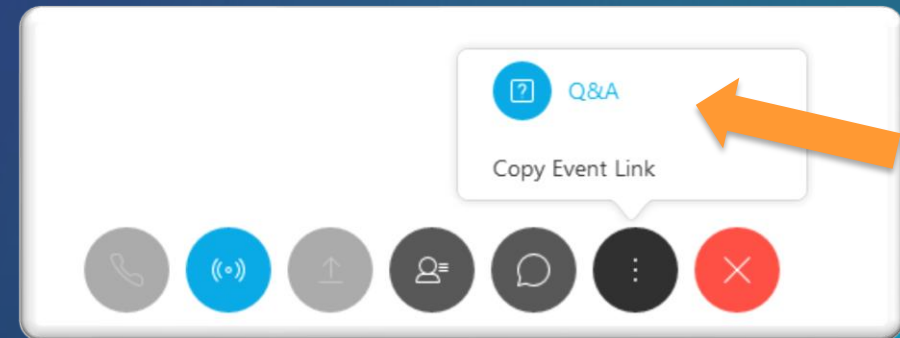

- We are recording today
- Expect an email from us with link
- Please share your thoughts on the exit survey

Open to Questions

- Please use the Q&A panel:
 - Choose *Ask: All Panelists*, type your question and click *Send*

- If you're unable to see the Q&A panel, click the three dots and then the Q&A button on the control dock at the bottom of your screen:

Today's Agenda

This webinar is designed to further your understanding about the new ArcGIS Field Maps, specifically:

1. Using the **Field Maps web app** to enhance your maps
 - Working with the **web map smart form**
2. Tips & Tricks for **migrating** from existing mobile apps to Field Maps
 - For Collector, Explorer & Tracker users
3. **Integrating** Field Maps within your mobile workflows
 - Using Url links
 - Link from assignments in ArcGIS Workforce

Poll ... ArcGIS field solutions users ...

Which ArcGIS mobile app(s) are you migrating to Field Maps from?

1. **Collector**
2. **Explorer**
3. **Tracker**
4. **Not migrating – new to Field Maps**

Choose as many as apply!

Preparing for mobile data collection with Field Maps

ArcGIS Field Maps: one app to rule them all

Phase I: Fall 2020

Simple map viewing & markup ~ *Explorer*

Field data capture & inspections ~ *Collector*

location tracking technology ~ *Tracker*

Planning & task management ~ *Workforce* Phase II: TBD

Turn-by-turn navigation ~ *Navigator* Phase III: TBD

ArcGIS Dashboards, Survey123 & QuickCapture
to remain as separate apps

ArcGIS Field Maps: mobile app

Released November 2020, updated December 2020: **iOS & Android**

- **Map Viewing:** includes existing functionality in **Explorer** for read-only maps
 - Access publicly shared maps **without ArcGIS identity/no sign-in**
 - **Mobile Map Packages** (created in ArcGIS Pro & optimized for offline map use: used by Explorer & Navigator)
- **Editing:** includes all existing **Collector** functionality & more
 - Android on par with iOS!
- **Map Markup:**
 - Notes, freehand sketch, markers
 - Share peer-to-peer, by email, to ArcGIS Organization
- High accuracy data collection: support for location & collecting with GNSS
- View, record and share location tracks ~ **Tracker** functionality
- Online & Offline support
- ArcGIS Online & Enterprise 10.8.1+
- Can use with Enterprise 10.6.1 - 10.8: must register the ArcGIS Field Maps app ID

Field Maps in-office workflow

1. Create & configure your layers ✓

- New layers in ArcGIS Organization using templates
- Existing layers in ArcGIS Organization (hosted feature layer)
- Existing layers in ArcGIS Server – published to your Enterprise portal
- Create domains, subtypes, feature templates, set default symbology
- Allow attachments, restrict editing permissions

2. Create your web map ✓

- In ArcGIS Pro (publish to ArcGIS organization)
- ArcGIS Organization Map Viewer: recommend Map Viewer Beta as it supports the form
- Add layers: editing, reference, basemap
- Configure popup, scale dependencies, add bookmarks (*used in ad-hoc offline*)

3. Open web map in Field Maps web app & configure options: ✓

- Content: Editable layers:
 - Feature templates: use existing or make copy to modify
 - Configure Form for each layer (*read-only forms coming to future release*)
 - Share to groups (uses ArcGIS Organization share settings)
 - Offline (optional)

Field Maps Web App:
ArcGIS Online
(included)

Enterprise 10.8.1
Installer

10.9 included

Field Maps In-Office Workflow for Offline

[Offline Guide](#)

3 options for offline:

1. [Configure a web map for download & create map areas for mobile workers to take offline](#)
2. [Configure a web map for download & allow mobile workers to define map areas to take offline](#)
3. [Create & share an MMPK that can be downloaded by mobile workers or copied directly to devices](#) **(READ ONLY)**

Additional configuration in Field Maps web:

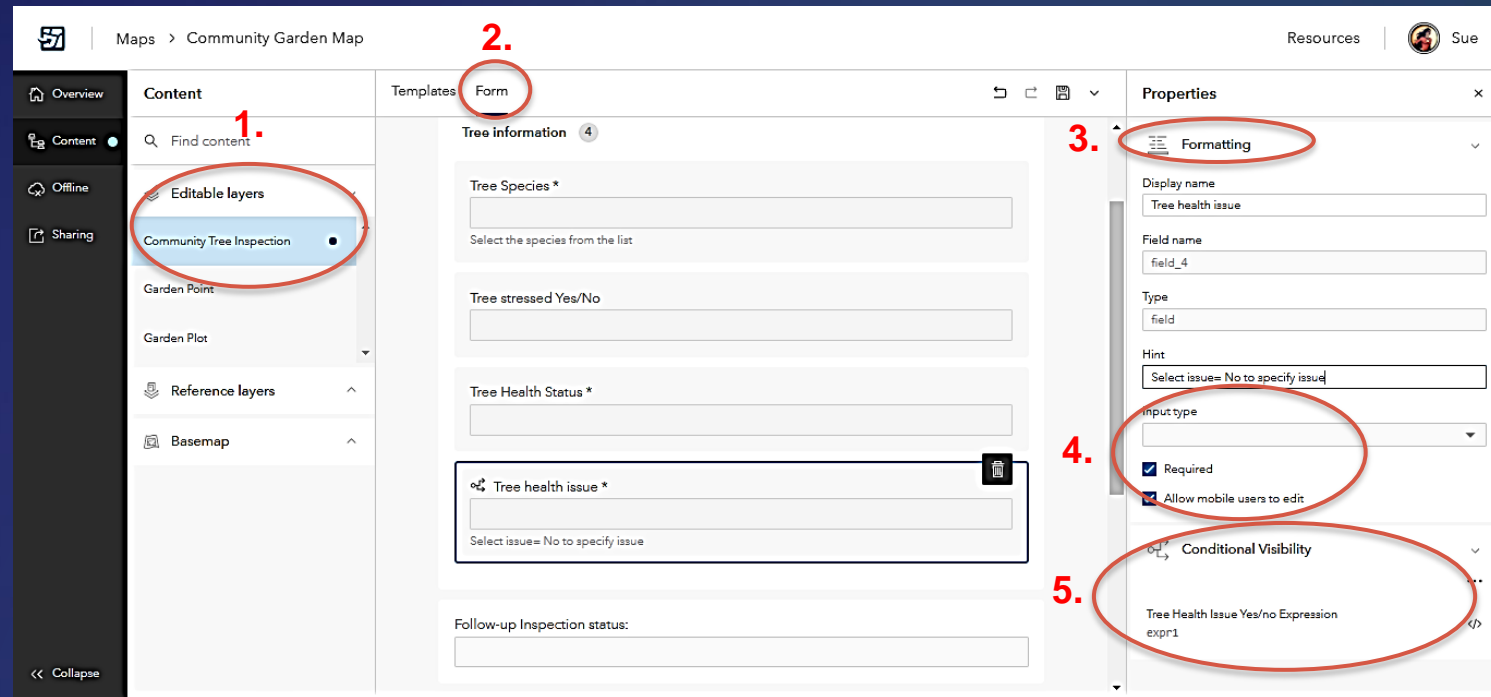

- Enable **offline** for the map; check all layers (editable, reference, tables, basemaps) are enabled for offline
- **Optional: create offline areas**
 - TIP: need to first save a COPY of the same map for connected & ad-hoc offline use!
- Specify Feature & attachment delivery options to optimize download & sync
- Specify to use a tile package for the [offline basemap](#) (.vtpk, .tpk or .tpkx – download to device)

Tips for Going offline with Enterprise:

- Configure [layers for offline use](#) (hosted feature layers, Server layers)
- Esri Basemaps are NOT enabled for offline use by default : [add basemap from ArcGIS Online](#) for offline use

Field Maps Web App – Configure the Form

- Create new or convert from map pop-up
- calculate entries based on formulas & other parts of the form using Arcade
- **Add/Remove attributes**
- **Make Required**
- **Allow users to Edit or make read-only**
- **use default values** from feature template
- **Set input type** (text, numeric & date field options)
- **Use Arcade expressions > Arcade Editor**
 - Apply **conditional visibility** to fields using Arcade Constraint Profile
 - Setup to scan barcodes & QR codes
- **Group attributes**
 - Name and description
 - Collapse/Expand
 - Organize, order fields

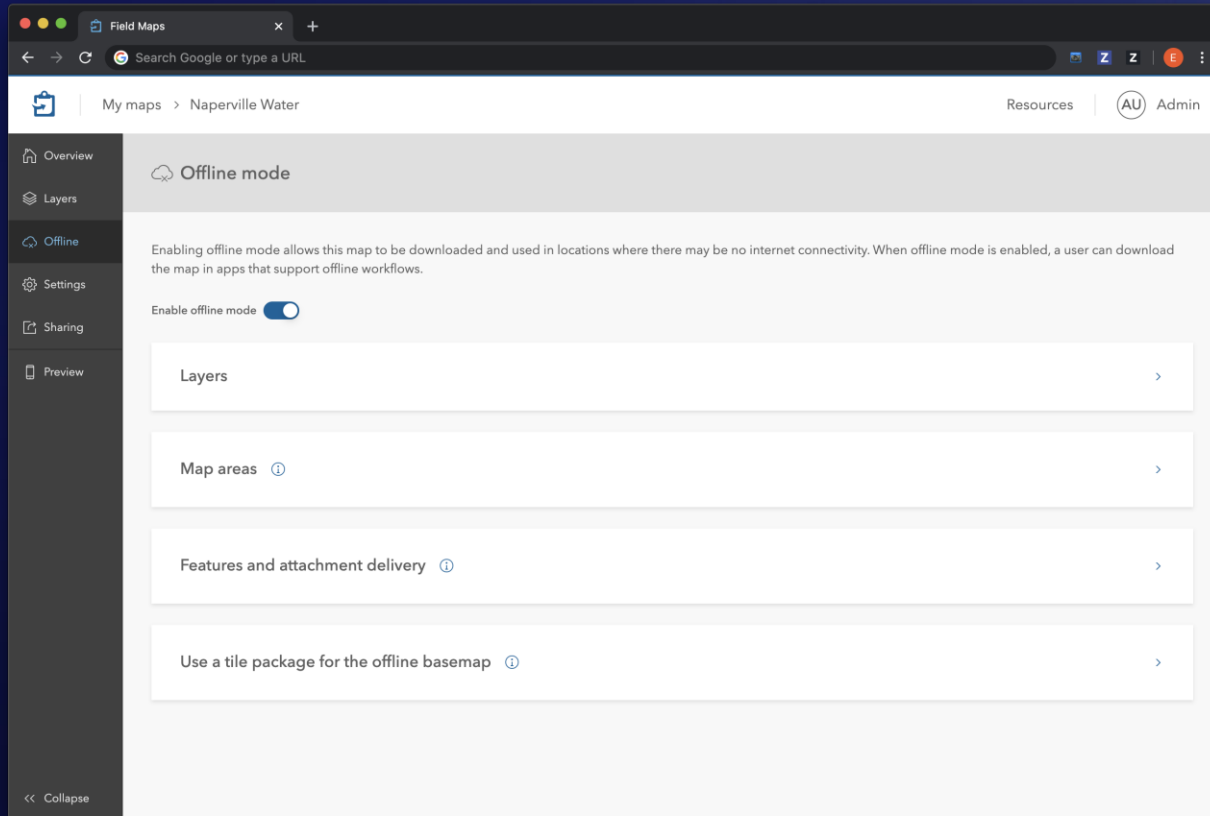

The screenshot shows the configuration interface for a form titled "Tree information". The interface is divided into several panels:

- Content Panel (Left):** Shows "Editable layers" with "Community Tree Inspection" selected. A red circle and the number "1." highlight this section.
- Templates Panel (Middle):** Shows "Form" selected. A red circle and the number "2." highlight this section.
- Properties Panel (Right):** Shows "Formatting" selected. A red circle and the number "3." highlight this section. Below it, the "input type" dropdown is highlighted with a red circle and the number "4.", and the "Required" checkbox is checked. The "Conditional Visibility" section is also highlighted with a red circle and the number "5.", showing the expression "Tree Health Issue Yes/no Expression expr1".

 **Tip:** Once you configure & save the form you must use Map Viewer Beta if further *editing* the map or your form will be lost !

****Much more to come to form capabilities in future phased releases...***

Field Maps Web App Demo

Q&A: Using Field Maps web app

any questions?

Migrating to the Field Maps Mobile App

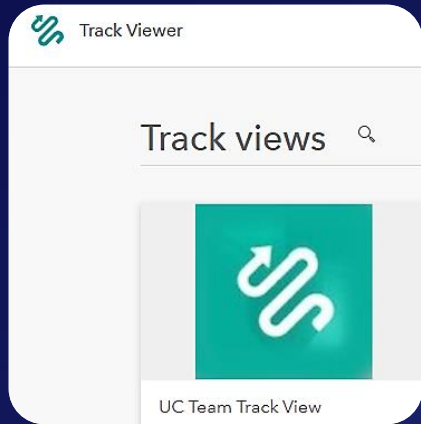

Tricks & Tips for Working With the Field Maps Mobile App:

Collector & Explorer users

- Work with existing web maps used in **Collector** or **Explorer** “as-is” in Field Maps mobile
 - user interface in Field Maps is identical to the UI in Collector and Explorer
 - “Use in Field Maps” setting for web maps is checked on by default
 - Use same web map for read-only users as well as editors
 - Users who do not have editing user types & privileges will only be able to open the map & layers contained as read-only
 - Offline maps previously downloaded onto devices need to be copied into the Field Maps Map Packages folder on the device
 - Offline options: [mmpks](#) ~ prepare mobile map packages (same process as for Explorer)

[Migrating Blog Post](#)  [Migration Guide](#)

Tricks & Tips for using **Location Tracking** with Field Maps

Location Tracking in your ArcGIS Organization:

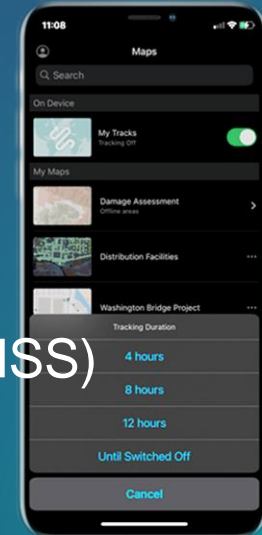

- **Enable ArcGIS organization location tracking capability**
- Track points stored in 2 point layers: Last Known Locations & Tracks
- Purchase & provision **Tracker licenses** as required
 - For any level of users including Viewer
- **Track Viewer web app** to create Track views & Add users
 - View tracks in other maps & apps
- ArcGIS Enterprise 10.7+ (10.8+ Track Viewer automatically installed)

[FAQs](#)

[Blog Post](#)

Location tracking in the Field Maps mobile app:

- Turn on tracking from maps list upon sign-in or from GPS banner in map
 - Set duration for tracking (4, 8, 12 hours, until switched off)
 - Turn on My Tracks form Layers to view in map
- Track with or without cellular/wifi connection (uses your device GPS or external GNSS)
- Apple Watch support: start tracking, set duration
- Tracker users: use Field Maps only for tracking > view in any shared map (optional)

Field Maps Mobile App Demo

Q&A: Field Maps mobile app

Field Maps: Integration using Mobile App Links

1. Open Field Maps from a Universal app link

- Help Topic [Open your map from a link](#) to learn more about constructing app links

<https://fieldmaps.arcgis.app?parameter=value¶meter=value>

- Supports a number of parameters including open map, search and set location, set initial feature capture & more:
 - *itemID (map id), scale, bookmark, center (coordinates), geometry, feature attributes (populate Specified entries), callback, GNSS AntennaHeight & LocationProfile*

2. Open other ArcGIS mobile apps from Field Maps:

- Configure link in a custom popup for attribute(s)
 - Pass parameters to fill out – including attribute values
 - Link to **Survey123**: [documentation](#), [blog posts](#)
 - Link to [QuickCapture](#)
 - Directions > **Navigator** option from settings

Other integration option:
link from assignments using
[ArcGIS Workforce](#) 

[URL links work online & offline](#) - as long as forms & maps & projects downloaded to device

ArcGIS Organization Licensing Available in ArcGIS Online and Enterprise

- **Field Maps** honours existing licenses, user types & privileges
- Named user type determines what users can do in ArcGIS Mobile Apps: in-office and in the field
- App bundles provide access to mobile apps (part of Field Apps bundle)

Viewing

Editing

Authoring

Viewer

- Simple map viewing
- * *Location tracking*
- * *Turn by turn navigation*

Editor

- Field apps bundle ad-on**
- Simple map viewing
 - **Data capture & editing**
 - **Receive assignments**
 - * *Location tracking*
 - * *Turn by turn navigation*

Field Worker

- Field apps bundle included**
- Simple map viewing
 - **Data capture & editing**
 - **Receive assignments**
 - * *Location tracking*
 - * *Turn by turn navigation*

Creator

- Field apps bundle included**
- Simple map viewing
 - Map editing
 - **Receive & Create assignments**
 - **Create maps & apps**
 - * *Location tracking*
 - * *Turn by turn navigation*

GIS Professional

- Field apps bundle included**
- Simple map viewing
 - Map editing
 - **Receive & Create assignments**
 - **Create maps & apps**
 - **Desktop GIS & Analysis**
 - *Location tracking*
 - *Turn by turn navigation*

* **Add-on license: any level**

* Navigator & Tracker

A few more FAQs for migrating to Field Maps:

Q: Will Field Maps be released on Windows?

A: This is currently not under development. Go to [Field Maps Ideas](#) & make a suggestion!

- Alternative is [ArcGIS Pro 2.7 with GNSS support](#) for location & data collection
- ArcGIS Pro 2.7 also directly reads [mobile geodatabases](#) (format used offline in Field Maps)

Q: Can Field Maps be customized?

A: No, it is all configuration only. Review how much it does meet your workflow needs.

- While we always emphasize configuration before customization, other options are [Survey123](#) & QuickCapture – source code provided by [AppStudio](#)

Q: Is Field Maps the new Collector123/will provide all Survey123 capabilities in the form?

A: No: Survey123 provides many unique capabilities built upon XLS Form. It will continue to be supported & developed. Web map smart form capabilities are built upon the feature layer & map.

- Try out the new web map smart form to see what it can do for your workflows
- Test workflow with both apps & compare which meets your needs the best
- Much more is coming with the web map smart form – this is just the first release
- Web map smart forms will work across ArcGIS system: beta map viewer today, Pro & other apps later = advantage

FACT: You can use existing Phase 1 apps & Field Maps on the same device ~ so test your maps & workflows to make sure everything works the way you need it to
